Sustainable City Awards 2008 - Runner up - Sustainable Buildings Category

Building Magazine 2007 Award for Sustainable Refurbishment – Winner

home energy masterplan

**What do
you get?**

**You will receive a bespoke report
containing:**

-  **your home's existing energy and CO₂ profile and how you compare to similar homes**
-  **discussion of all sensible options available – and backed up with detailed, quantified analysis**
-  **packages of options to suit your budget and payback timescales**
-  **lots of up-to-date supporting information giving you all that you need to make informed choices**

*Easy to read and understand,
strategically relevant for years to
come*

*Using trained local surveyors across
the UK to carry out an onsite survey*

*Recommendations based on physics
and not conjecture or dogma –
using our specialist software*

*Takes into account your behaviour
and how to use your home*

*A masterplan for a typical three
bedroom house will cost £290 including
VAT**

We offer independent support through a number of services including eco-renovation project management, training, building monitoring, assessment for groups of house and consulting services to local government, housing associations and other organisations.
